

Maintenance Solutions

Use On:

- Porcelain
- Glass
- Ceramics
- Stainless Steel
- Cast Iron Surfaces

Features:

- Clings to Oven Surfaces
- Dissolves Grease
- Works in minutes
- Spray On, Rinse Clean
- Authorized by USDA for specific use in federally inspected meat and poultry plants

DESCRIPTION

This effective cleaner is safe to use on porcelain, glass ceramics, stainless steel, and cast iron surfaces. Keep spray or drippings away from the pilot lights, electrical connections, switches, receptacles, thermostats, heating elements, light bulbs, and other surfaces which might be affected by caustics. Avoid contact with painted or varnished surfaces, clothing, floor tile, linoleum, plastics, chrome, copper, aluminum, and coppertone surfaces. Not for use on self-cleaning or continuous cleaning ovens. Place newspaper under oven door to protect floor. Wear rubber gloves to avoid skin contact.

DIRECTIONS

1. Use on empty oven, either cold or pre-heated to 200°F and turned off. TURN OFF PILOT LIGHT and/or ELECTRIC SWITCH.
2. Hold can upright and point spray button away from face. SHAKE WELL, then spray inside of oven from a distance of 8 to 12 inches, giving it an even coating.
3. Spray top and bottom of oven first; then spray remaining oven surfaces and allow to stand about 30 minutes. (May be left on overnight with oven door closed.)
4. Wipe oven clean with damp cloth, sponge, or paper towel. Spots that are difficult to remove should be retreated and cleaned with a scouring pad. Rinse with potable water.
5. When clean, re-ignite pilot light, or turn on electric switch, and heat oven to 400° F for 10 minutes before using with food again. This product is also excellent for cleaning grills, rotisseries, stove burners, electric frying pans, and other cookware that is resistant to caustic.

Product Specifications

Color: Opaque White
 Scent: Acrid
 pH: 13.5
 Propellant: Hydrocarbon
 Spray Pattern: Wide, foamy cone
 Flammability: Non-Flammable as per CPSC Flame Extension Test as described in 16 CFR 1500.45.
